Cyber-attack

Cyber-attack is any type of offensive maneuver employed by individuals or whole organizations that targets computer information systems, infrastructures, computer networks, and/or personal computer devices by various means of malicious acts usually originating from an anonymous source that either steals, alters, or destroys a specified target by **hacking** into a susceptible system. These can be labeled as either a **Cyber campaign**, **cyber warfare** or cyber terrorism in different context. Cyber-attacks can range from installing **spyware** on a PC to attempts to destroy the infrastructure of entire nations. Cyber-attacks have become increasingly sophisticated and dangerous as the **Stuxnet** worm recently demonstrated. Cyber warfare utilizes techniques of defending and attacking information and computer networks that inhabit cyberspace, often through a prolonged **Cyber campaign** or series of related campaigns. It denies an opponent's ability to do the same, while employing technological instruments of war to attack an opponent's critical computer systems. Cyber terrorism, on the other hand, is "the use of computer network tools to shut down critical national infrastructures (such as energy, transportation, government operations) or to coerce or intimidate a government or civilian population."^[2] That means the end result of both cyber warfare and cyber terrorism is the same, to damage critical infrastructures and computer systems linked together within the confines of cyberspace.

Yes but do not open it**

Albert Einstein; by Yordanos kebede

Albert Einstein was born in Germany in 1879. He became famous

As a scientist and as one of the most important thinkers of our Times. In 1933 when the dictator Adolph Hitler came to power in

Germany, Einstein left his native land for good. Einstein was a Jew. Hitler hated Jews. In 1940 Albert Einstein became a citizen of

The United States.

Although he made many

Important discoveries,

He is best known for

His theory of relativity.

This law became the

Most famous equation in

Science. It read $E=mc^2$. “E”

Stands for energy, “m”

Stands for matter, and “c”

Stands for the speed of

Light multiplied by itself.

In 1946 Einstein joined with other scientists to form a committee to warn the world of the results.
